Projets

- **Fidek - Digital Freelance Marketplace Connecting Clients and Service Providers**
  Fidek is a digital platform inspired by Fiverr that connects clients with freelance service providers. The application features dedicated interfaces for buyers and sellers, enabling sellers to showcase their services and submit offers, while clients can browse services, communicate with providers, and complete their orders seamlessly. With an organized design for efficient transaction management, Fidek enhances the user experience and facilitates smooth interactions between both parties.
